To whom it may concern,

I'm Saksham, a graduate student at Carnegie Mellon University. I am majoring in Information Security and Computer Systems. I am really passionate about security and systems. Therefore, I am applying to Vitech as I think it would be great fit for me. I recently worked at Google as a summer intern and worked on the App Identity team, under the Google Product Infrastructure Vertical. It has given me great insight into how MNCs work on infrastructure and security.

My project, Protect My Privacy was funded by DARPA and Google. Protect My Privacy allows people the flexibility to use their data only for app's functionality and not for data mining. This project was downloaded by over 30,000 privacy and security enthusiasts even though it required a rooted Android device. Given the impact of this project, I was asked to present it at FTC's annual Privacy Con in 2018 as well as at the DARPA Brandeis Meeting.

I have worked on Distributed Systems including implementing Raft consensus algorithm, a distributed File System modelled on Facebook's Haystack paper and a cryptocurrency ledger.

I am looking for Full-Time positions at Vitech for Software Engineering.

Best regards,
Saksham Chitkara
Graduate Student at Carnegie Mellon University
Software Engineering Intern at Google

Hi,

I am Saksham, a graduate student at Carnegie Mellon University majoring in Information Security.

- *I interned at Google over the summer, working on Account Security and keeping Google accounts safe.*
- *I worked on a DARPA and Google funded project, Protect My Privacy, where users can only allow apps to read their data for functionality. It was downloaded by over 30,000 privacy and security enthusiasts.*
- *I was asked to present this work at FTC's Privacy Con and ACM Ubicomp.*
- *I want to join a team which is growing and where I will have the opportunity to learn and make an impact.*

Please find my LinkedIn profile here: https://www.linkedin.com/in/saksham-chitkara/

I have also attached a PDF version of my resume.

It would be great if we could we set up a 15-minute intro call?

Best,

Saksham
